

Table of Contents

Section I. Introduction

1. Evolution of the Coronary Care Unit: Past, Present, and Future
2. Ethical Issues of Care
3. Physical Examination

Section II. Scientific Foundation of Cardiac Intensive Care

4. The Role of the Cardiovascular System in Coupling the External Environment to Cellular Respiration
5. Regulation of Cardiac Output
6. Coronary Physiology and Pathophysiology
7. Pathophysiology of Acute Coronary Syndromes: Plaque Rupture and Atherothrombosis
8. Regulation of Hemostasis and Thrombosis

Section III. Coronary Artery Disease

Acute Myocardial Infarction

9. Diagnosis of Acute Myocardial Infarction
10. Use of the Electrocardiogram in Acute Myocardial Infarction
11. Reperfusion Therapies for Acute ST- Elevation Myocardial Infarction
12. Adjunctive Pharmacologic Therapies in Acute Myocardial Infarction

Complications of Acute Myocardial Infarction

13. Post-Myocardial Infarction Cardiogenic Shock
14. Right Ventricular Infarction
15. Mechanical Complications of Acute Myocardial Infarction
16. Supraventricular and Ventricular Arrhythmias in Acute Myocardial Infarction

17. Conduction Disturbances in Acute Myocardial Infarction

Complications of Percutaneous Interventional Procedures

Section IV. Noncoronary Diseases: Diagnosis and Management

18. Acute Heart Failure and Pulmonary Edema

19. Acute Fulminant Myocarditis

20. Stress (Takotsubo) Cardiomyopathy

21. Distributive Shock

22. Cardiorenal Syndrome

23. Sudden Cardiac Death

24. Diagnosis and Treatment of Ventricular Tachycardia

25. Diagnosis and Treatment of Unstable Supraventricular Tachycardia

26. Acute Presentations of Valvular Heart Disease

27. Hypertensive Emergencies

28. Acute Aortic Syndromes: Diagnosis and Management

29. Acute Pericardial Disease

30. Acute Respiratory Failure

31. Massive Acute Pulmonary Embolism

32. Pulmonary Hypertension

33. Hemodynamically Unstable Presentations of Congenital Heart Disease in Adults

34. Overdose of Cardiotoxic Drugs

Section V. Pharmacologic Agents in the Cardiac Intensive Care Unit

35. Anticoagulation: Antithrombin Therapy

36. Anti-platelet Therapy

- 37. Inotropic and Vasoactive Agents
- 38. Intensive Diuresis and Ultrafiltration
- 39. Antiarrhythmic Electrophysiology and Pharmacotherapy
- 40. Analgesics, Tranquilizers, and Sedatives
- 41. Pharmacologic Interactions

Section VI. Advanced Diagnostic and Therapeutic Techniques: Indications and Technical Considerations

- 42. Central Venous Access Procedures
- 43. Temporary Pacing
- 44. Pericardiocentesis
- 45. Invasive Hemodynamic Monitoring
- 46. Temporary Mechanical Circulatory Support Devices
- 47. Ventricular Assist Device Therapy in Advanced Heart Failure
- 48. Heart Transplantation for Advanced Heart Failure
- 49. Emergency Airway Management
- 50. Mechanical Ventilation
- 51. Cardiopulmonary Cerebral Resuscitation after Cardiac Arrest
- 52. Palliative Care
