

Table of Contents

Preface

1. Principles of Medical Genetics and Genomics
2. Non-Mendelian Genetics
3. Principles of Genetic Counseling
4. Cytogenetics: Part 1, General Concepts and Aneuploid Conditions
5. Cytogenetics: Part 2, Structural Rearrangements and Reproductive Impact
6. Molecular Genetics
7. Carrier Screening
8. Serum and Ultrasound Based Screening Tests for Aneuploidy
9. Cell Free DNA Screening
10. Ultrasound Markers for Aneuploidy
11. Genetic Evaluation of Fetal Sonographic Abnormalities
12. Chromosomal Microarray Analysis
13. Exome and Genome Sequencing
14. Prenatal Diagnostic Testing
15. Preimplantation Genetic Screening and Diagnosis
16. Fetal Treatment of Genetic Disorders
