

Table of contents

Section I. Fertility Operations by Anatomic Location

- 1.1 Evaluation and Management of the Vaginal Septum
- 1.2 Creation of a Neovagina
- 2.1 Evaluation and Management of Cervical Agenesis
- 2.2 Laparoscopic Abdominal Cerclage for Cervical Insufficiency
- 3.1 Correction of Asherman Syndrome
- 3.2 Repair of Cesarean Section Scar
- 3.3 Excision of Uterine Septum
- 3.4 Uterine Polypectomy
- 3.5 Uterine Myomectomy
- 4.1 Tubal: Lysis of Adhesions
- 4.2 Tuboplasty/Neosalpingostomy
- 4.3 Tubal: Salpingectomy
- 4.4 Tubal Reanastomosis
- 5.1 Ovary: Cystectomy
- 5.2 Laparoscopic Ovarian Drilling
- 6.1 Removal of endometrial Implants
- 6.2 Ovarian Cystectomy of an Endometrioma
- 6.3 Laparoscopic Excision of Bowel Endometriosis
- 6.4 Excision of Endometriosis: Segmental Bladder Resection
- 6.5 Video-Assisted Thoracoscopic Surgery for Endometriosis

Section II. Assisted Reproductive Technology Procedures

- 7 Transvaginal Oocyte Retrieval
- 8 Embryo Transfer

Section III. Office Procedures

- 9 Imaging of Reproductive Organs
- 10 Assessment of the Endometrial Lining and Evacuation of the Uterus
